

SUPRANOVA

Benefits:

- ✓ **Aggressive**
- ✓ **Early spring green up**
- ✓ **Handles close mowing**
- ✓ **Adapts to shaded areas**
- ✓ **Great disease resistance**
- ✓ **Rapid recovery**
- ✓ **Under 50%-75% light reduction conditions, ground coverage was consistently higher than other species**

Seeding Rates:

8-10 pounds per 1,000 square feet.

Supranova Supina Bluegrass produces a thick dense turf with a medium green color. This grass is ideally suited for parks, sports fields, golf courses, home lawns and commercial properties because of its aggressive nature, close mowing height, and wear tolerance.

Supranova shows resistance to snow mold, dollar spot and red thread. **Supranova** grows best in wet and moist conditions.

Supranova can be seeded alone or in a mixture. A little in your mix goes a long way. It should be used at between 5 and 20 percent of the mixture depending on the application. Under certain conditions Supina will become the dominant turf in a mix over Poa annua, Annual ryegrass, Perennial ryegrass, Bluegrass, Fine and Tall fescue.

Growth Habit	Rhizomes
Establishment Rate	14-21 days
Nitrogen Requirements	High
Mowing Frequency	Medium
Water Use	Moderate
Wear Tolerance	Moderate
Shade Tolerance	Low
Approx. Seeds Per Lb.	2,000,000
Ideal Mowing Height	0.75"-1.5"
