

SUPERIOR YIELD AND QUALITY FOR INTENSIVE HARVEST MANAGEMENT

Dominator II

- Superb regrowth maximizes total seasonal yield and quality.
- Very fast recovery and accelerated growth for frequent harvest schedules.
- Quick canopy closure naturally suppresses weed competition and conserves soil moisture for crop growth.
- Excellent persistence, winterhardiness and disease resistance package.

| AGRONOMIC TRAITS | |
|--------------------------------|-------|
| Fall Dormancy | 5.0 |
| Winter Hardiness | 1.8 |
| Multifoliolate Leaf Expression | 60% |
| Disease Resistance Index | 34/35 |

| DISEASE RESISTANCE TRAITS | |
|-------------------------------|----|
| Anthracoese | HR |
| Aphanomyces Root Rot (Race 1) | HR |
| Aphanomyces Root Rot (Race 2) | R |
| Phytophthora Root Rot | HR |
| Bacterial Wilt | HR |
| Fusarium Wilt | HR |
| Verticillium Wilt | HR |

| PEST RESISTANCE TRAITS | |
|-----------------------------|---|
| Blue Alfalfa Aphid | - |
| Pea Aphid | R |
| Spotted Alfalfa Aphid | - |
| Cow Pea Aphid | - |
| Stem Nematode | R |
| Northern Root Knot Nematode | - |
| Southern Root Knot Nematode | - |

Management Guidelines

Dominator II offers the StandFast® Fast Growth trait to maximize the total seasonal yield and forage quality. This faster growth starts with the first crop and gives a head start to each season. Dominator II will green up 3 to 5 days ahead of most other alfalfas, which shortens the days to harvest maturity and to the next cutting. Along the way, more yield is harvested at mid-summer when heat units and moisture are usually more available and weather can be more cooperative. In the field, Dominator II is a tall, robust alfalfa with a dense, dark green leafy canopy. Dominator II is widely adapted across a broad range of geographies and soil types.
